

# Single Price Model – final status before go-live

15.09.21

Visit [nordicbalancingmodel.net](http://nordicbalancingmodel.net)

# Approaching go-live

- Single Price project parties have completed the tests. Common and local systems are ready to go-live
- NRA approvals of BRP T&C and changes to national legislation expected to be finalised on time
  - No blocking issues assumed for Single price, formal approval processes consumes more time than anticipated
- Where relevant, updated BRP agreements are to be signed during October
- Message of the confirmed go-live date is to published on **8<sup>th</sup> of October 21.**

**Go-live is foreseen on 1<sup>st</sup> of November 2021**

# Publication of imbalance price and additional components

- Imbalance price is to be published on ENTSO-E Transparency platform (TP) from 1.11.2021 under Area (IPA\*)
  - Current data is published under Market Balance Area (MBA)
- Imbalance price, Value of avoided activation (VoAA) and Incentivizing component (IC) are to be published on eSett webpage and on Fingrid's open data
  - Publication of IC on TP is planned in 2022

entsoe  
Transparency Platform

Central collection and publication of electricity generation, transportation and consumption data and information for the pan-European market.
