

# Status of the NBM Roadmap

Stakeholder reference group meeting 14th September 2021

## Key development

- Target go-live for Nordic aFRR Capacity Market fully dependent on the Nordic Flow-based external parallel run. As that has been now reported delayed, target go-live date must be assessed and decided when new plan is known.
- National aFRR capacity market go-live for individual TSOs to be changed to Earliest Q4, 2021 due to prolonged UAT.
- Single pricing go live dependent on NRA approvals and legislative processes
